ALABAMA MEDICAID AGENCY
PREFERRED DRUG LIST BY THERAPEUTIC CATEGORY

As a result of legislation passed by the Alabama State Legislature in June 2003, the Alabama Medicaid Agency implemented a mandatory Preferred Drug List, effective October 1, 2003. Brand preferred drugs, generics (some exceptions apply) and over-the-counter (OTC) drugs covered by Medicaid are available without prior approval. If a non-preferred drug is ordered, the practitioner will need to obtain prior authorization (PA). Drugs that are "preferred with clinical criteria" will also require a prior authorization request be submitted. If approval is given to dispense the requested drug, an authorization number will be provided. Antipsychotic and HIV/AIDS drugs are exempt from this requirement.

Below is a list of brand preferred products on the PDL. The drug name denotes all dosage forms and strengths unless noted. An asterisk (*) denotes a generic is available in at least one dosage form or strength. All covered OTC drugs and generic products (unless otherwise specified) are considered preferred. For a more complete list including non-preferred brands and more information concerning the PDL, please visit our website at www.medicaid.alabama.gov.
