CareSource Georgia Medicaid

7/1/2026

INTRODUCTION

This is the 2026 **CareSource Medicaid Formulary or Preferred Drug List (PDL).** This list can help providers in picking clinically appropriate and lower priced products. All Georgia Medicaid drugs are covered by CareSource. This is just a list of preferred drugs.

These drugs have been reviewed by the CareSource Pharmacy and Therapeutics (P&T) Committee. The list is up to date at the time of review.

We do not promise the accuracy of the data. It is also not meant to be a full list. It does not substitute for the provider's knowledge, skill and judgment. All the data in the list is a guide. Providers are fully responsible for all drug choices.

The list is subject to state-specific laws and rules. This can be, but is not limited to:

- those about generic option
- controlled substance schedules
- brand preference
- mandatory generics (when it applies)

We take no responsibility for the actions or gaps of any provider. They should review the drug maker's product data or standard references.

PREFACE

The list is set up in sections. Each section is split up by therapeutic drug class by method of action. Products are listed by generic name. The brand name is also listed. This is for information only. Unless the drug is an injection or special case, the dosage, forms and strengths are listed.

P&T COMMITTEE

A national P&T Committee are used to approve safe and useful drug therapies. It is made up of:

- the plan's medical directors
- pharmacy staff
- those in the medical community

DRUG COVERAGE DETAILS

Only a strength, dosage or other formulation may be covered if listed. Other strengths/dosages/formulations are not covered. For example: injectable forms of the product. Extended- and delayed-release products have their own listing.

metformin Glucophage
The immediate-release product listing would not have the extended-release product.

metformin ext-rel Glucophage XR
A second listing shows the extended-release product.

Dosage forms will be part of the section where listed.

Neomycin/polymyxin B/hydrocortisone Cortisporin

Cortisporin is only in the OTIC list. It is limited to the solution and suspension. The cream cannot be assumed to be on the list. It would need to be part of the DERMATOLOGY. section.

Prior Authorizations (PA)

CareSource may need providers to send us why a drug or amount is needed. This is called a PA. CareSource must approve this before a member can get the drug. “PA” means that a PA is needed. Here are some reasons for a PA:

- A generic or alternative drug is available.
- The drug can be misused or abused.
- The drug needs special handling, monitoring or has limited shipping.
- There are other drugs that must be tried first.

PA Requests

Health partners may ask for a PA online or by fax. Find out more on the Providers page at CareSource.com. We may not approve a PA ask for a drug. If we don't, we will tell the member how to appeal.

Quantity Limits

Some drugs have limits on how much can be given at a time. “QL” is used to show there is a quantity limit. QLs are based on the drug makers’ suggested dosing. Patient safety is also kept in mind. Therapy with opioid analgesics may have quantity limits. These are based on drug makers' recommended dosing and/or state regulations.

The quantity limits are in the list below.

Step Therapy

Members may need to try one drug before taking another. This is called Step Therapy. One drug must be tried before another will be approved for use. CareSource will cover some drugs only if the Step Therapy protocol is followed. “ST” is used in the list when it is needed.

Generic Substitution and Therapeutic Interchange

Generic substitution is a pharmacy action. A generic version is given instead of a brand-name product. Italic type means there is a generic. Not all strengths or dosage forms of the generic may be generically on hand. A brand-name drug that has a generic product

will become non-formulary. The generic product will be covered in place of the brand-name product. The list is subject to state-specific regulations and rules about generic substitution.

Generic drugs are often priced lower than the brand-name. They should be prescribed first if the standards are followed. Prescription generic drugs are:

- Approved by the U.S. FDA. This is for safety and effectiveness. They are made under the same strict standards as brand-name products.
- Tested in humans. The generic must be absorbed at the same rate as the brand-name product. They may differ from the brand in size, color, and inactive ingredients. This does not alter their use.
- Made in the same strength and dosage form as the brand-name products.

A generic drug will have the same effect and safety as the brand name.

PLAN DESIGN

The list shows a closed formulary plan design. The drugs listed are covered by the plan as listed. Certain drugs are covered if utilization management standards are met. This can be ST, PA, and/or QL. Asks for drugs outside of the listed standards will be reviewed. If a drug is not listed, a formulary exception may be asked for coverage. Medical need or formulary exception asks will be reviewed. This is based on PA measures or standard non-formulary prescription criteria. A member or a provider can ask for a formulary exception. Fill out the form found on the PDL page at **CareSource.com.**

Note: This list is updated regularly. Changes may show before their effective date.

List of Abbreviations

1: Preferred generic product

2: Preferred brand product

ACA: Affordable Care Act

AR: Age Restriction. For certain drugs, the drug may be covered for members in a certain age range without a prior authorization.

OTC: Over-the-Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
