HEALTH CARE SERVICES

Revision History

Drug Name	Description	Effective Date
Atenolol/Chlorthalidone	Added to the CDL.	September 1, 2026
Candesartan Cilexetil/Hydrochlorothiazide	Added to the CDL.	September 1, 2026
Dofetilide	Added to the CDL.	September 1, 2026
Dronedarone HCL	Added to the CDL with LR.	September 1, 2026
Isatuximab-Irfc	Additional strength (1,400 mg/10 ml) added to the CDL with LR.	September 1, 2026
Ivabradine HCL	Added to the CDL.	September 1, 2026
Mechlorethamine HCL	LR added.	September 1, 2026
Olmesartan Medoxomil/ Amlodipine/ Hydrochlorothiazide	Added to the CDL.	September 1, 2026
Propafenone HCL	Additional formulation (extended-release capsules) added to the CDL.	September 1, 2026
Roflumilast	LR added to 0.15%, 0.3% cream and 0.5 foam. Additional strength (0.05%) added to the CDL with LR and QL.	September 1, 2026
Tislelizumab-Jsgr	Additional strength (150 mg/15 mL) added to the CDL with LR.	September 1, 2026
Albuterol/Budesonide	Added to the CDL with LR.	October 1, 2026
Dapagliflozin Propranediol	LR removed.	October 1, 2026
Glucagon (synthetic)	QL updated for nasal spray.	October 1, 2026
Iberdomide	Added to the CDL with LR.	October 1, 2026
Lubiprostone	Added to the CDL.	October 1, 2026
Patiromer Calcium Sorbitex	Additional strength added to the CDL.	October 1, 2026
Segesterone Acetate and Ethinyl Estradiol	LR updated.	October 1, 2026
Zidesamtinib	Added to the CDL with LR.	October 1, 2026
Amlodipine/Valsartan/ Hydrochlorothiazide	Removed from the CDL.	November 1, 2026
Asciminib Hydrochloride	PA required.	November 1, 2026
Bictegravir/Lenacapavir	Added to the CDL with LR.	November 1, 2026

Drug Name	Description	Effective Date
Brigatinib	PA required.	November 1, 2026
Fluocinolone Acetonide (otic oil/drops)	Added to the CDL with LR.	November 1, 2026
Influenza Virus Vaccine	Additional strength (37.5 mcg/0.38 mL) added to the CDL.	November 1, 2026
Lamotrigine	Additional formulation (suspension) added to the CDL with AL.	November 1, 2026
Naldemedine Tosylate	Added to the CDL with LR.	November 1, 2026
Pralsetinib	LR updated.	November 1, 2026
Risankizumab-rzaa	Additional dosage form (Single-Dose Prefilled Syringe) added to the CDL with QL and LR. AL removed.	November 1, 2026
Sonrotoclax	Added to the CDL with LR.	November 1, 2026
Vigabatrin	Added to the CDL with LR.	November 1, 2026
Fluocinolone Acetonide (topical oil)	**Effective December 1, 2026:** LR added.	December 1, 2026
Naloxegol Oxalate	**Effective December 1, 2026:** PA required.	December 1, 2026
Insulin Lispro	**Effective January 1, 2027:** LR updated.	January 1, 2027

General Provisions

1. Provisions of coverage are contained in the *California Code of Regulations* (CCR), Title 22, Sections 51313, 51313.3, and 51313.6.
2. Code I drugs marked with a symbol (*) require authorization in accordance with Section 51003 unless used under the conditions specified in the Contract Drugs List (CDL) and are subject to the prescription documentation requirements in CCR, Title 22, Section 51476I. Refer to CCR, Title 22, Section 51313.3(b).
3. Drugs marked with a symbol (+) have a frequency of billing requirement. Refer to CCR, Title 22, Section 51513(b)(3). Full payment (drug ingredient cost plus a professional fee component) to a pharmacy is limited to a maximum of three claims for the same drug and strength dispensed to the same member within any 75-day period. The fourth claim from any provider, and subsequent claims for the same drug and strength dispensed to the same member within any 75-day period will be paid at the drug ingredient cost only. Exceptions are with the initial prescription, when authorization is obtained for more frequent billing, or when drugs are dispensed in a quantity of 180 or more tablets or capsules.
4. Drugs marked with a symbol (††) have a unit price based on the package size determined by the Director to be the size most frequently purchased by providers. Refer to CCR, Title 22, Section 51513(a)(2). A complete listing of these drugs is found in the *Reimbursement* section of the *Medi-Cal Rx Provider Manual*.

Legend Drugs

Legend drugs that are listed in the CDL are covered by the Medi-Cal program. Legend drugs not listed may be covered subject to authorization from a Medi-Cal consultant.

Non-Legend Over-the-Counter Drugs

Non-legend over-the-counter (OTC) drugs that are listed in the CDL are covered by the Medi-Cal program. OTC drugs not listed, and not otherwise excluded, may be covered subject to authorization from a Medi-Cal consultant.

OTC Antihistamine, Nasal Decongestant, and Combinations

All OTC cough and cold products are restricted to individuals 2 years of age and older.

Compounded Prescriptions

Prescribed drugs listed in the CDL and unlisted drugs approved by authorization that require special compounding by the pharmacist are covered by the Medi-Cal program, provided that the name, quantity, and principal labeler of each ingredient are listed on the claim.

Cost Ceiling Limits

Claims submitted to Medi-Cal Rx are subject to the cost ceiling claim edit Reject Code 78 – Cost Exceeds Maximum. To improve pharmacy claim submission and processing quality and to mitigate potential Fraud, Waste, and Abuse (FWA) in Medi-Cal Rx, the previous $10,000 cost ceiling policy has been revised to the following cost ceiling categories as outlined in the following table:

Cost Ceiling Limits		
Drug/Product	**Identifier**	**Value Per Claim**
Over-the-Counter (OTC)	OTC	$50
Generic	Generic	$1,000
Single and Multisource Brand	Brand	$4,000
High-Cost Drug (HCD) – Generic and Brand	HCD	$14,000

Note: Cost ceiling limits impacting drugs for the NDCs provided on the *Medi-Cal Rx Approved NDC List* are categorized by the following Cost Ceiling Limit Identifiers:

- **OTC:** Over-the-counter products where the claim threshold amount is equal to or greater than $50.
- **Generic:** Generic drugs where the claim threshold amount is equal to or greater than $1,000.
- **Brand:** Brand, multisource drugs where the claim threshold amount is equal to or greater than $4,000 when the claim is submitted with a Dispense As Written (DAW) code of DAW 1. These claims will be subject to Brand Medically Necessary (BMN) prior authorization (PA) requirements.
  - **Note:** Claims without a DAW 1 will be evaluated based on the Generic cost ceiling limit.
- **HCD:** High-cost generic and brand drugs, not in the Generic or Single and Multisource Brand categories, where the claim threshold amount is equal to or greater than $14,000.
- **Excluded:** Drugs excluded from the cost ceiling limits.
  - **Note:** Other products excluded from cost ceiling limits include specific disposable medical supplies, diabetic testing supplies, COVID-19 antigen tests, enteral nutrition products, OTC insulin, and drugs submitted as a compound claim.

Additional information can be found in the *Medi-Cal Rx Provider Manual*.

Drugs Used in the Treatment of HIV

Drugs indicated for the treatment of HIV may be used for PEP without obtaining a PA.

Erectile Dysfunction Drugs: Non-Benefit

Erectile Dysfunction (ED) drugs have not been a Medi-Cal benefit since the enactment of Assembly Bill 2885 (Chapter 95, Statutes of 2006) on July 20, 2006. AB 2885 amended *Welfare and Institutions Code* (W&I Code), Section 14132, that specified drugs used to treat ED, or any off-label use of those drugs, would only be reimbursable by Medi-Cal if Federal Financial Participation (FFP) was available. FFP has not been available for ED drugs since January 1, 2006.

GLP-1 Drugs for Weight Loss: Non-Benefit

Effective January 1, 2026, GLP-1 drugs when used for weight loss or weight loss-related indications are not a Medi-Cal Rx covered benefit except for members younger than 21 years of age pursuant to the federal Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) benefit.

Medi-Cal Rx reviews and adjudicates PAs submitted for the following indications approved by the U.S. Food and Drug Administration (FDA) on a case-by-case basis to establish medical necessity and to determine if the member's individual needs are met:

- Wegovy® when used for cardiovascular disease
- Zepbound® when used for obstructive sleep apnea (OSA)

PA requests submitted for weight loss or weight loss-related indications will be reviewed for medical necessity for members younger than 21 years of age pursuant to the federal EPSDT benefit. Include the following information when submitting a PA request:

- Diagnosis/diagnoses
- Quantity/days' supply
- Other products tried and the reason(s) why those products do not meet the member's needs
- Contraindications and allergies
- Chart notes/lab reports
- Supporting literature, compendia, or treatment guidelines if for off label use

Hormone Therapy and Puberty Blockers for Gender-Affirming Care: Non-Benefit

On August 13, 2026, the Centers for Medicare & Medicaid Services (CMS) released a final rule titled *Medicaid Program; Prohibition on Federal Medicaid and Children's Health Insurance Program [CHIP] Funding for Sex-Rejecting Procedures Furnished to Children* (*Code of Federal Regulations* [CFR], Title 42, Parts 441 and 457), which stated that drugs/products used to treat gender-affirming care (GAC) would not be reimbursable by Medi-Cal beginning October 13, 2026.

Effective October 13, 2026, hormone therapy and puberty blockers used for GAC indications are not a covered benefit under Medi-Cal Rx for Medi-Cal members younger than 18 years of age or Children's Health Insurance Program (CHIP) members younger than 19 years of age. Medi-Cal Rx reviews and adjudicates PAs submitted for the impacted drugs/products for non-GAC indications for these member populations.

Note: Medi-Cal and CHIP members who are already taking gender-affirming hormones as of October 13, 2026, will continue to have these medications reimbursed by Medi-Cal through April 12, 2027, as the CMS final rule allows for this time-limited "transition period" of up to six months. After April 12, 2027, these medications will be reimbursed with state-only funding. This transition period does **not** apply to puberty-blocking medications or surgical interventions. It also does not apply to Medi-Cal members who are newly starting hormone therapy on or after October 13, 2026.

Controlled Substance Policy

Claims for all controlled substances, including opioids (DEA Schedule II-V) will have a **maximum days' supply** of 35 days. A PA request will be required for claims submitted for more than 35 days.

Note: This limit does **not** apply to new start opioid prescriptions.

New start opioid claims will be restricted to a 7-day supply or a maximum **quantity** of 30 solid dosage units (each) or 240 ml for liquids.

Claims submitted for controlled substances will be restricted to the following utilization limits:

Controlled Substance Utilization Limits			
Description	Max Day Supply	Quantity Limit	Refill Threshold
All Controlled Substances (except opioids, benzodiazepines, buprenorphine)	35	Refer to the CDL for specific drugs where applicable.	75%
Benzodiazepines *	35	Daily quantity: 8 each (solid) or 240 ml (liquid). Refer to the CDL for additional limit(s) where applicable.	75%
Buprenorphine products indicated for pain	35	Refer to the CDL for specific drugs where applicable.	75%
Buprenorphine products indicated for Opioid Use Disorder	35	Sublingual dosage daily limit: 32 mg. Refer to the CDL for additional limit(s) where applicable.	75%
Opioid New Start ** (Absence of opioid therapy in the past 90 days prior to the current claim's DOS. Cough preparations containing opioids are excluded from the opioid drug lookback.)	7	Max Dispense quantity: 30 each (solid) or 240 mL (liquid).	90%
Opioid Chronic Therapy ** (Presence of opioid therapy in the member's history within the prior 90 days. Opioid therapy lookback includes long-acting, short-acting, and buprenorphine products. Cough preparations containing opioids are excluded from this lookback.)	35	500 MME	90%

Controlled Substance Utilization Limits			
Description	Max Day Supply	Quantity Limit	Refill Threshold
* Limitations for benzodiazepine **do not** apply to special populations, except for the 75% refill threshold.			
** Limitations for opioids **do not** apply to special populations, except for the 90% refill threshold.			

Dispensing Limits for Insulin Products

For prandial insulins (which includes rapid-, short-, intermediate-acting, and mixed insulins) with concentrations of 100 units per milliliter, the maximum quantity per fill allowed is 75 ml, which allows for up to 7 vials (10 ml each) or 5 boxes totaling 25 pens or cartridges (3 ml each).

For basal/long-acting insulins with concentrations of 100 units per milliliter, the maximum quantity per fill allowed is 60 ml, which allows for up to 6 vials (10 ml each), or 4 boxes totaling 20 individual pens (3 ml each).

Due to differences in packaging, the maximum quantity per fill allowed for concentrated formulations is as follows:

- 200 units per milliliter – 36 ml which allows dispensing of up to 12 pens.
- 300 units per milliliter – 24 ml which allows dispensing of up to 8 pens (or up to 15 pens, depending on the specific packaging).
- 500 units per milliliter – 60 ml which allows dispensing of up to 3 vials (20 ml each) or 10 boxes, 20 pens (3 ml each).

Drugs Removed From the Contract Drugs Lists

The Department of Health Care Services (DHCS) will send out a 60-day notice prior to the removal of a drug from the CDL. After the 60 days, the medication will only be available through the PA process regardless of if a patient has been on the medication or not.

Utilization Management Types

Code	Description
AL	Age limit: age parameters must be met.
LR	Labeler restriction: claim must reflect indicated labeler code for claim to pay.
QL *	Quantity limit: claim will reject if defined quantity limits are exceeded.

* Quantity limits (QLs) allow a sufficient supply of medication based on FDA-approved or medically accepted maximum daily doses and length of therapy of a particular drug to ensure safe and effective medication use while reducing inappropriate/overuse. QLs may be administered as quantity over time or a maximum daily dose. Quantity over time is based on dosing guidelines over a rolling time period. Maximum daily dose (maximum quantity per day) is based on maximum number of units of the drug allowed per day. Refer to the specific manufacturer's prescribing information for additional details.

To ensure safe and effective medication use, covered products may have quantity limits not listed on the CDL that are reflective of sound clinical practices and FDA-approved dosing. Prescribing above a quantity limit will require PA approval.

In addition, some covered products listed on the CDL have a QL utilization management (UM) code listed in the UM Type column of the CDL table. A "QL" indicates that the medication has a Medi-Cal Rx specific quantity limit as a Code I restriction. Prescribing above a Code I "QL" quantity limit will require a PA approval.

Amyotrophic Lateral Sclerosis Agent

Drug Name	Dosage	Strength/ Package Size	Billing Unit	UM Type	Code I
Amyotrophic Lateral Sclerosis Agent					
Edaravone *	Oral Suspension (including Starter Kits)	105 mg/5 ml	ml	LR	* Restricted to NDC labeler code 70510 only.
Riluzole	Tablets	50 mg	ea		

Anti-Alcoholism

Drug Name	Dosage	Strength/ Package Size	Billing Unit	UM Type	Code I
Anti-Alcoholism					
Acamprosate Calcium	Delayed-Release Tablets	333 mg	ea		
Disulfiram	Tablets	0.25 gm 0.5 gm	ea ea		

Anti-Gout

Drug Name	Dosage	Strength/ Package Size	Billing Unit	UM Type	Code I

Urine Acid Modifiers					
Citric Acid/Sodium Citrate	Oral Solution	334 mg-500 mg	ml		

Intravenous Solutions

Simple Intravenous Solutions (milliliter)

Simple intravenous (I.V.) solutions are typically used for hydration therapy. Included are commercially available (non-compounded) solutions such as Normal Saline, Dextrose (up to 10% in Water), and Lactated Ringer's Solution; commercially prepared solutions of potassium chloride in such solutions are also included in this definition. Simple intravenous solutions should be billed using the product's NDC number.

Parenteral Nutrition Solutions (TPN or Hyperalimentation) (milliliter) *

- Restricted to dispensing within 10 days following inpatient discharge from an acute care hospital, when I.V. therapy with the same product was started before discharge. There is a maximum of 10 days' supply per dispensing within this 10-day period.

(Parenteral nutrition solutions are intravenously or intra-arterially administered nutritional products that are typically suspensions or solutions of amino acids or protein, dextrose, lipids, electrolytes, vitamin and/or mineral supplements, and trace elements.)

Adjuncts to parenteral nutrition are other drugs which are physically mixed into a parenteral nutrition solution at any time prior to administration. Bill for these products as part of the parenteral nutrition billing.

Note: Non-compounded products must be billed using the product's NDC number. Compounded solutions must be billed as a compound claim. Refer to the *Completion Instructions for California Specific Compound Pharmacy Claim Form (30-4)* section of the *Medi-Cal Rx Provider Manual* for more information.

Separately Administered Intravenous Lipids (milliliter) *

- Restricted to dispensing within 10 days following inpatient discharge from an acute care hospital, when I.V. therapy with the same product was started before discharge. There is a maximum of 10 days' supply per dispensing within this 10-day period.

Intravenous lipid solutions or suspensions that are administered separately from parenteral nutrition solutions (that is, are not physically mixed into the parenteral nutrition solution container) should be billed using the product's NDC number.

Intravenous Solutions of Unlisted Antibiotics (milliliter) *

- Restricted to dispensing within 10 days following inpatient discharge from an acute care hospital, when I.V. therapy with the same antibiotic was started before discharge. There is a maximum of 10 days' supply per dispensing within the 10-day period.

Note: Non-compounded products must be billed using the product's NDC number. Compounded solutions must be billed as a compound claim. Refer to the *Completion*

Instructions for California Specific Compound Pharmacy Claim Form (30-4) section of the *Medi-Cal Rx Provider Manual* for more information.

Intravenous Solutions of Other Unlisted Drugs (milliliter) *

- Restricted to dispensing within 10 days following inpatient discharge from an acute care hospital, when I.V. therapy with the same drug was started before discharge. There is a maximum of 10 days' supply per dispensing within the 10-day period.

Note: Non-compounded products must be billed using the product's NDC number. Compounded solutions must be billed as a compound claim. Refer to the *Completion Instructions for California Specific Compound Pharmacy Claim Form (30-4)* section of the *Medi-Cal Rx Provider Manual* for more information.
