Optum Rx®

TennCare: Preferred Drug List (PDL)

Effective November 2, 2026

With the exception of the Branded Drugs Classified as Generics list, TennCare is a mandatory generic program in accordance with state law (TCA 53-10-205). Approval of a branded product when a generic is available requires documentation of a serious adverse reaction from the generic via an FDA MedWatch form OR contraindication to an inactive ingredient in the AB-rated generic equivalent. Therapeutic Failure of an AB-rated generic equivalent may be considered for approval of branded products in the following high-risk medication classes: Anticonvulsants, Atypical Antipsychotics, HIV antivirals, Immunosuppressants, and Oncology Agents.

Unless otherwise noted, all agents listed on the PDL are referencing legend drugs which are prescription-required agents. Coverage of Over-the Counter (OTC) Products is listed at: TennCare OTC Drug Formulary and TennCare OTC Supplements Formulary.

Visit https://contenthub-aem.optumrx.com/content/dam/contenthub/onboarding/assets/Tenncare/Criteria-PDL.pdf to view Clinical Criteria, Step Therapy, and Quantity Limits.

Please note the following:

- All agents must be prescribed by a provider with a Tennessee Medicaid Provider ID.
- Approval of Non-Preferred (NP) agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.
- Agents not listed on PDL may be considered non-preferred unless otherwise indicated.
- Agents that must be administered by a healthcare provider or in a healthcare facility may by covered under medical benefits. Providers should refer to the patient's Managed Care Organization (MCO) for coverage information. Please refer to the Covered Injectable Drugs list for exceptions.
