Molina Healthcare of Illinois Preferred Drug List (Formulary)

(07/01/2026)

INTRODUCTION

We are pleased to provide the 2026 *Molina Healthcare of Illinois Preferred Drug List (Formulary)* as a useful reference and informational tool. This document can assist medical providers in selecting clinically-appropriate and cost-effective products for their patients.

This Formulary is up to date through its date of publication, April 1, 2026. Please notify Molina Healthcare of Illinois at mhilpharmacy@molinahealthcare.com or 1-855-866-5462 with any mistakes in the formulary.

Molina Healthcare of Illinois only covers drugs made by a manufacturer that participates in the Federal Medicaid drug rebate program. Drugs obtained through the Molina Healthcare of Illinois prescription drug benefit are covered at no cost to the member.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. All the information in the document is provided as a reference for drug therapy selection.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, general principles are noted below:

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., *atorvastatin*).
- The second column (Requirements/Limits) contains any special requirements for coverage of the particular drug.
- If both the OTC and Prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms on the document will be consistent with the category and use where listed.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In this document, *lowercase italicized* type indicates generic availability for the brand name product. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.

- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

The document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard nonformulary prescription request criteria.

CATEGORIES OF CONSIDERATION

OPIOID ANALGESICS, BENZODIAZEPINES, MUSCLE RELAXANTS

- All Opioid Analgesics are subject to a Morphine Equivalent Dose of 90 mg per day, Acute Pain Duration Limits, and ER Opioid Step Therapy.
- Concurrent use of Opioid Analgesics, Benzodiazepines, and/or Muscle Relaxants may be subject to clinical review.

NON-COVERED MEDICATIONS

Please note that certain medications are not covered. These include, but are not limited to:

- Appetite Suppressants / Anorexiant for weight loss
- Drugs for Cosmetic Purposes
- Drugs to treat infertility
- Drugs to treat erectile dysfunction
- Experimental or Investigational Medications
- Convenience Dosage Forms not listed on the Formulary
- Pharmaceuticals determined by the Federal Drug Administration (FDA) to be less than effective and identical, related or similar drugs (frequently referred to as “DESI 5 and 6” drugs)

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have demonstrated ineffectiveness. When these exceptional situations arise, the physician may fax a completed drug prior authorization form to Molina at (855) 365-8112. The forms may be obtained by logging into the website www.molinahealthcare.com. Trials of pharmaceutical samples will not be considered as rationale for approving a prior authorization request.

PRIOR AUTHORIZATION HELPFUL HINTS

To ensure the quickest response possible from MHIL Pharmacy Department, please provide clinical documentation with the Prior Authorization request. The following are examples:

Class of Medication/Diagnosis

Cholesterol Lowering

Diabetes

Non-Formulary/Non-Preferred Medication

Requested Clinical Information

Lipid Panel, Cardiovascular risk factors

A1c Report

Medication Log and/or Progress Notes documenting previous use of Formulary medications

LEGEND

AGE	Age Limit
OTC	Over-the-counter, covered benefit with a prescription
PA	Prior Authorization
PA, QL	Quantity Limit is applied after Prior Authorization approval
QL	Quantity Limit
SP	Specialty Drug; these drugs must be obtained through a specialty pharmacy
ST	Step Therapy
Preferred	Preferred product, may require Prior Authorization
Non-preferred	Non-Preferred product, requires Prior Authorization and documentation of medical necessity

URGENT AND AFTER-HOURS MEDICATION POLICY

To prevent a member's condition from worsening in an urgent situation, it may be necessary to dispense a 72-hour supply of an acute medication before prior authorization may be obtained from Molina Healthcare. (e.g., a member is discharged from a hospital after regular business hours with a special antibiotic prescription). Pharmacies are instructed to use their professional judgment. Molina Healthcare will reimburse pharmacies for a 72-hour supply of an acute medication at contracted rates for these prescriptions. Pharmacies may contact CVS Caremark Help Desk at (800) 364-6331 to obtain an override for a 72-hour supply.

Pharmacies may call Molina Healthcare at (855) 866-5462 on the following business day to obtain authorization to allow the urgent or after-hours prescription to process on-line. It is advised and expected that the pharmacy will provide reasonable documentation of cases where medications were dispensed under these urgent circumstances.
