The Michigan Department of Health and Human Services, in conjunction with Prime Therapeutics State Government Solutions LLC, is pleased to offer an alternative means to submit pharmacy prior authorization (PA) requests for prescription drugs. This electronic PA (ePA) process is designed to save prescribers time by providing a real-time pharmacy prior authorization. This process will supplement the more traditional means of requesting PAs by phone or fax, which will still be available to providers. In order to use ePA, provider designees will need to register to receive a username and password for the CoverMyMeds Electronic Prior Authorization (ePA) system. Detailed information on user registration is available at https://mi.primetherapeutics.com/provider/links/links. For questions or assistance with registration, call the Prime Therapeutics State Government Solutions LLC Web Support Call Center at 800-241-8726.
