

Virginia Preferred Drug List (PDL) / Common Core Formulary QuickList

Effective April 1, 2026

General Information:

- **Virginia Medicaid's Preferred Drug List (PDL) only includes select drug classes**
- PDL preferred drugs do not require Service Authorizations (SA) unless subject to additional clinical criteria (e.g., long acting opioids, hepatitis C therapies, growth hormone)
- Non-preferred drugs require a SA
- Drugs not on the PDL are subject to Virginia's mandatory generic substitution requirements.
- SAs may be submitted by fax, phone or WebPA. For urgent requests, please call **800-932-6648**. Fax requests receive a response within 24 hours. **Fax: 800-932-6651**.

PDL drug coverage information can be found at <http://www.VirginiaMedicaidPharmacyServices.com>. The following "routine" PDL criteria guidelines will be applied to all non-preferred drugs.

1. Is there any reason the member cannot be changed to a preferred drug within the same class? Acceptable reasons include:
 - Allergy to preferred drug.
 - Contraindication to or drug-to-drug interaction with preferred drug.
 - History of unacceptable/toxic side effects to preferred drug.
 - Member's condition is clinically stable; changing to a preferred drug might cause deterioration of the member's condition.
2. The requested drug may be approved if both of the following are true:
 - There has been a therapeutic failure of at least **two** preferred drugs **within the same class as appropriate for diagnosis unless otherwise noted in the clinical criteria**. A therapeutic failure of only one preferred drug is required when there is only one preferred drug within a therapeutic class.
 - The requested drug's corresponding generic (if a generic is available and covered by the State) has been attempted **and** failed or is contraindicated.

ALL new preferred changes from last posting will be highlighted in yellow.
